

# David Cox, Ph.D.

Curriculum Vitae | June 2011

## Contact Information

The Rowland Institute at Harvard  
100 Edwin H. Land Blvd.  
Cambridge, MA 02142  
office: (617) 497-4682  
fax: (617) 497-4627  
email: [cox@rowland.harvard.edu](mailto:cox@rowland.harvard.edu)  
www: <http://www.rowland.harvard.edu/cox>

## Research Appointment

### **The Rowland Institute at Harvard – 2007-present**

Rowland Fellow  
Principal Investigator, Vision Lab @ The Rowland Institute  
Harvard University, School of Engineering and Applied Sciences

## Education

### **Massachusetts Institute of Technology, Cambridge, MA – 2002-2007**

**Ph.D.** in Neuroscience (major area of concentration in computational neuroscience)  
Advisor: James DiCarlo, M.D., Ph.D.

### **Harvard University, Cambridge, MA – 1996-2000**

**A.B.** Biology and Psychology  
Magna Cum Laude with Highest Honors in Biology and Psychology

## Research Summary

We recognize visual objects with such ease that it is easy to overlook what an impressive computational feat this represents. Any given object in the world can cast an infinite number of different images onto the retina, depending on its position relative to the viewer, the configuration of light sources, and the presence of other objects in the visual field. In spite of this extreme variation, biological visual systems are able to effortlessly recognize hundreds of thousands of distinct object classes—a feat that no current artificial system can come close to achieving.

My laboratory seeks to understand the computational underpinnings of object recognition through a concerted effort on two fronts. First, we endeavor to understand the workings of biological visual systems using a variety of experimental techniques, ranging from microelectrode recordings to visual psychophysics. Second, we attempt to instantiate what we have learned into artificial object recognition systems, leveraging recent advances in parallel computing to build systems that begin to approach the scale of natural systems. By combining reverse- and forward-engineering approaches, we hope to accelerate progress in both domains.

## Publications

### Journal Papers

Cox DD, Savoy RL (2002) A Statistical Pattern Recognition Approach to fMRI. Annual Meeting of the Organization for Human Brain Mapping, Sendai, Japan.

Cox DD, Savoy RL (2001) Detecting and Classifying Distributed Patterns of Activity in Human Visual Cortex. Society for Neuroscience Annual Meeting. San Diego, CA.

## **Presentations and Invited Lectures**

Workshop on Biologically Consistent Vision at IEEE CVPR (2011) Keynote Lecture. "Ten things every computer vision researcher should know about neuroscience"

Brown University, Dept. of Applied Mathematics (2011) "Untangling Invariant Object Recognition: A Highthroughput Approach"

Qualcomm Research, San Diego, CA (2011) "Scaling-up Biologically-Inspired Machine Vision"

Many Core and Reconfigure Supercomputing Conference, Rome, Italy (2010) "Towards an embedded vision processor"

GPU Technology Conference, San Jose, CA (2010) "Unlocking Biologically-Inspired Face Recognition: A Case Study on Facebook"

Harvard University, Bioengineering Symposium (2009) "Reverse and Forward Engineering High-Level Vision"

Aptina Corporation, San Jose, CA (2010) "Opportunities in biologically-inspired vision"

Snowbird Learning Workshop (2010)

Harvard University, Department of Computer Science (2009)

National Center for Supercomputing Applications, Great Lakes Virtual School on Petascale Computing. Keynote Lecture (2009)

NVISION, San Jose, CA (2008)

Harvard University, Center for Brain Science (2008)

Computational System Neuroscience, Multivariate Analysis Workshop (2008)

Massachusetts Institute of Technology, Dept. of Brain and Cognitive Sciences (2005)

fMRI Visiting Fellowship Program, Athinoula A. Martinos Center (2004)

American Psychological Association Advanced Training Institute, MGH (2003)

McGovern Institute 1st Annual Retreat, Massachusetts Institute of Technology (2003)

Athinoula A. Martinos Center, Massachusetts General Hospital (2002)

## Select Open Source Projects

**MWorks** (<http://mworks-project.org>) Software for performing automated behavioral and neurophysiology experiments.

**Self Calibrating Eyetracker** (<http://www.github.com/coxlab/eyetracker>) Open source software and hardware for performing gaze tracking, especially in species that do not reliably produce volitional saccades

**Stereo X-Ray Electrode Localization** (<http://www.x-runner.org>) Software and hardware designs for stereo microfocal x-ray localization of implanted microelectrodes.

**Audio Neurophysiology** (<http://www.github.com/coxlab/spike-audio-unit/>) Software for performing online spike detection in Apple's Core Audio framework.

**Portable Kinect** (<http://www.rowland.harvard.edu/cox/projects/subprojects/kinect/>) A hardware mod to enable the Microsoft Kinect to be used as a portable depth camera.

## Awards, Honors, and Fellowships

Rowland Junior Fellowship, Harvard University – 2007-present

National Defense Science and Engineering Graduate Fellowship – 2003-2006

Harvard Committee on Undergraduate Education Certificate of Distinction in Teaching – 2000, 2001

## Funding

### Internal Funding

Rowland Junior Fellowship: 5-year, open-ended, direct endowment funding for lab operations. 2007-2012.

### External Grants

IOS 0947777: "A Novel Rodent Model for the Neurophysiology of Visual Object Recognition." NSF. 2009-2011. \$150,000

IIS 0963668: "Collaborative Research: Unlocking Biologically-Inspired Computer Vision: A High-Throughput Approach." NSF. Co-PI: James DiCarlo. 2010-2013. \$820,000.

2010 Google Research Award. "A Large-Scale Feature Search Approach to Biologically-Inspired Computer Vision for the Analysis of Video." \$72,000.

### Resource/In-Kind Grants

TeraGrid Startup Allocation. "A High-Throughput Approach to Biologically-Inspired Computer Vision." 35,000 compute-hours on the National Center for Supercomputing Applications "Lincoln" CPU/GPU Cluster

Amazon Web Services. In-kind cloud computing services.

NVIDIA Professor Partnership Program. In-kind GPU computing hardware.

## Student and Postdoctoral Supervision

### Undergraduate Students

Pauline Gassman (University of Iowa, class of 2009), Summer 2007, 2008

Minjae Kim (Harvard University, class of 2011), Independent Study, Spring 2009

Kyle Marra (Boston College, class of 2012) Summer of 2011

Christine Lee (Duke University, class of 2014) Summer of 2011

### Visting Graduate Students

Chuan-Yung Tsai (National Taiwan University), 2011

### Postdoctoral Fellows

Davide Zoccolan, Ph.D. (2007-2009) *A novel rodent model for studying invariant visual object recognition*. Current position: Assistant Professor, International School for Advanced Studies (SISSA), Trieste, Italy.

Vinay Sriram, Ph.D.(2009-2010) *Hardware architectures for embedded biologically-inspired machine vision*. Current position: Director of Engineering IPACS Australia Pty Ltd.

Brett Graham, Ph.D. (2010-present) *Neuronal substrates of high-level vision in rodents*.

Nicolas Pinto, Ph.D. (2011-present) *High-throughput biologically-inspired visual object recognition*.

Nicolas Poilvert, Ph.D. (2011-present)

James Bergstra, Ph.D. (2011-present)

## Teaching

Guest Lecture ("Parallel Computing for Biologically-Inspired Vision") CS 264: Massively Parallel Computing (Harvard), Fall 2009.

Keynote Lecture, NCSA / Great Lakes Consortium for Petascale Computation Summer School: Many-Core Processors for Science and Engineering Applications, 2009

Guest Lecture ("Unlocking Biologically-Inspired Computer Vision: A High-Throughput Approach"), 6.963: CUDA@MIT (MIT), 2009

Guest Lecture ("Resampling Statistics"), 9.07: Introduction to Statistical Methods (MIT) – Spring 2006

Teaching Assistant, 9.02: Brain Laboratory (MIT) – Spring 2006

Invited Speaker, Advanced Training Institute in Functional MRI (American Psychological Association) – 2005

Teaching Assistant, 9.011 Systems Neuroscience (MIT) – Fall 2004

Teaching Assistant, 9.00 Introduction to Psychology (MIT) – Fall 2003

Teaching Assistant, Functional MRI Visiting Fellowship Program (Massachusetts General Hospital) – 2000-2006

Teaching Assistant, Psychology 1251, Introduction to Functional Neuroimaging Methods (Harvard) – Fall 2000, 2001

## **Professional Service**

### **Peer Review**

Reviewer for *Neuron*, *Journal of Neurophysiology*, *Journal of Neuroscience*, *Journal of Vision*, *Cortex*, *Cerebral Cortex*, *Cognitive Science*, *NeuroImage*, *Human Brain Mapping*, *IEEE Transactions in Medical Imaging*, *Neural Processing Letters*, *PLoS One*, *PLoS Computational Biology*, *Trends in Cognitive Science*, and *Brain and Behavioral Sciences*

*Ad hoc and panel reviewer for the National Science Foundation*

### **Conference / Workshop Organization**

*Program Committee, Computational Systems Neuroscience (Cosyne) 2011*

*Program Committee, ICST Bio-Inspired Models of Network, Information, and Computing Systems 2010.*

*Organizing Committee, Workshop on Biologically-Consistent Computer Vision, IEEE CVPR 2011*
